Professional Summary

With 17+ years in creative design and full-stack web development, I bridge artistic vision with technical execution. I've led teams, built high-performing websites, and developed WordPress/WooCommerce platforms generating $1M+ in annual sales. My expertise spans Linux/PHP to modern JavaScript frameworks, including maintaining legacy systems. Since 2016, I've supported IT and web needs for a family-owned logistics company. Now in Phoenix, I'm exploring generative AI to enhance creative workflows and seeking to apply my skills in an innovative team.
