📍 Las Vegas Based Nomad

I am excited to share my journey as a graphic design and web development professional with over 17 years of experience. Since 2006, I have transitioned from a graphic web designer to a full-stack developer, seamlessly blending creative design with technical expertise.

Throughout my career, I've led multidisciplinary teams to produce cohesive, high-quality outputs. My skills span both design and development, allowing me to bridge the gap between aesthetic appeal and functional efficiency.

I've utilized technologies like Linux, Apache/Nginx, MySQL, and PHP. Recently, I've embraced modern static JAMstack projects, leveraging frameworks like 11ty to create optimized and dynamic web experiences. My proficiency in CSS and JavaScript enables me to craft engaging and interactive websites.

Additionally, my extensive experience with WordPress, Elementor, Divi, and WooCommerce has led to successful eCommerce website builds, achieving annual sales exceeding one million dollars. I am adept at working with, troubleshooting, and updating older frameworks and versions of HTML, CSS, JavaScript, and PHP.

Recently, I have been focusing more on the artistic aspects of my profession, experimenting in the print-on-demand space and exploring the potential of generative AI to enhance my workflow. This has further enriched my skill set, allowing me to stay at the forefront of industry trends.

I am eager to bring my unique blend of design and development expertise to a dynamic team. I am confident that my skills and experience align well with a variety of needs and am excited about the possibility of contributing to future projects.

Thank you for considering my background and experience.

BRANDING

SAMPLING REALITY

This example uses a photo of food truck in the real world to create an illustrated version with AI.

Combined with additional art assets to produce a branding asset for "Munchies".

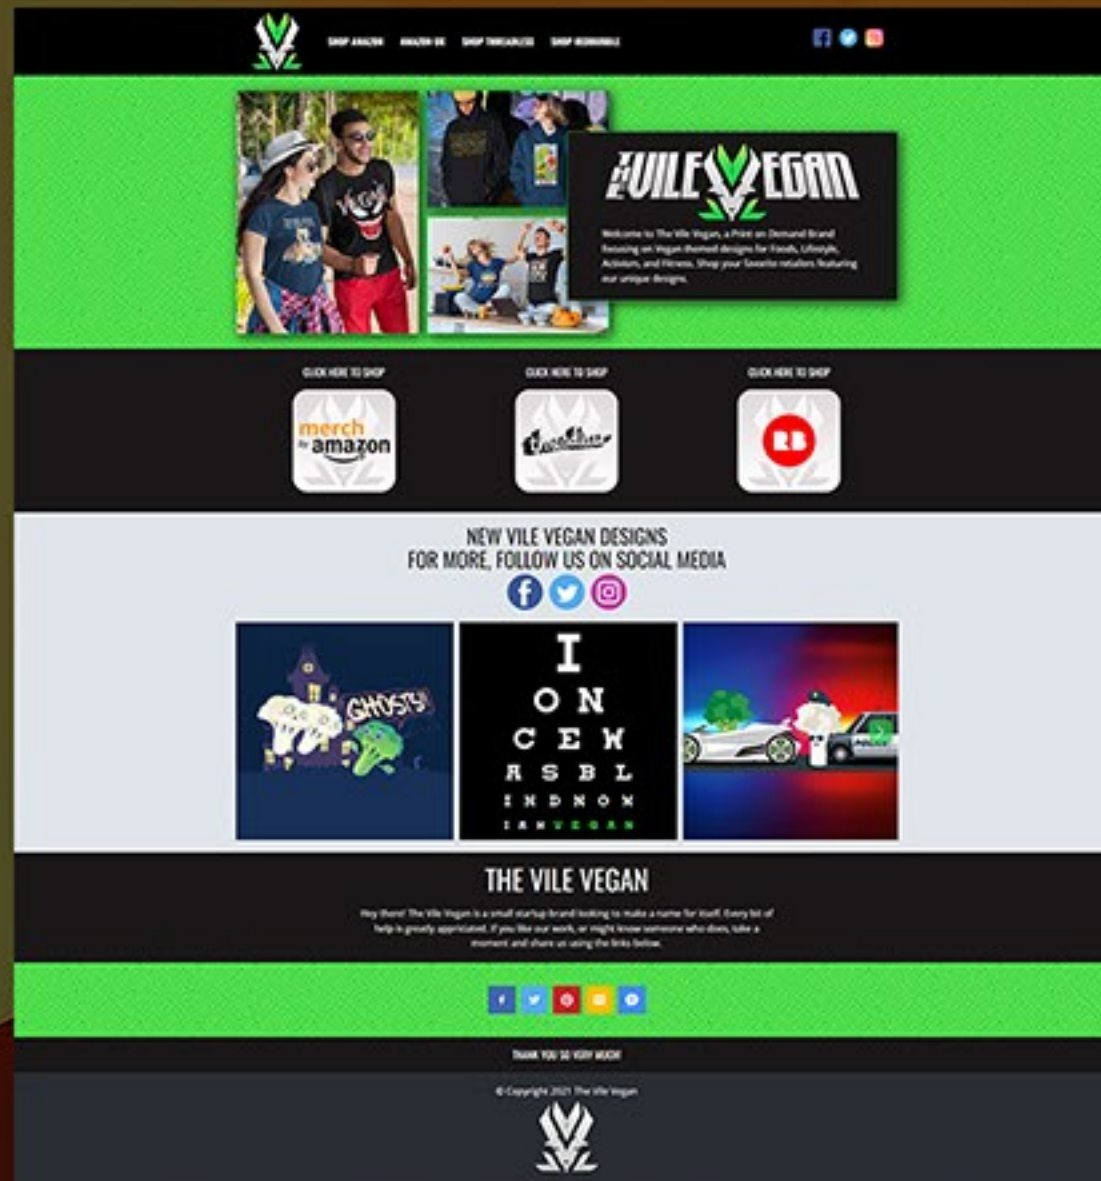

WEB DESIGN

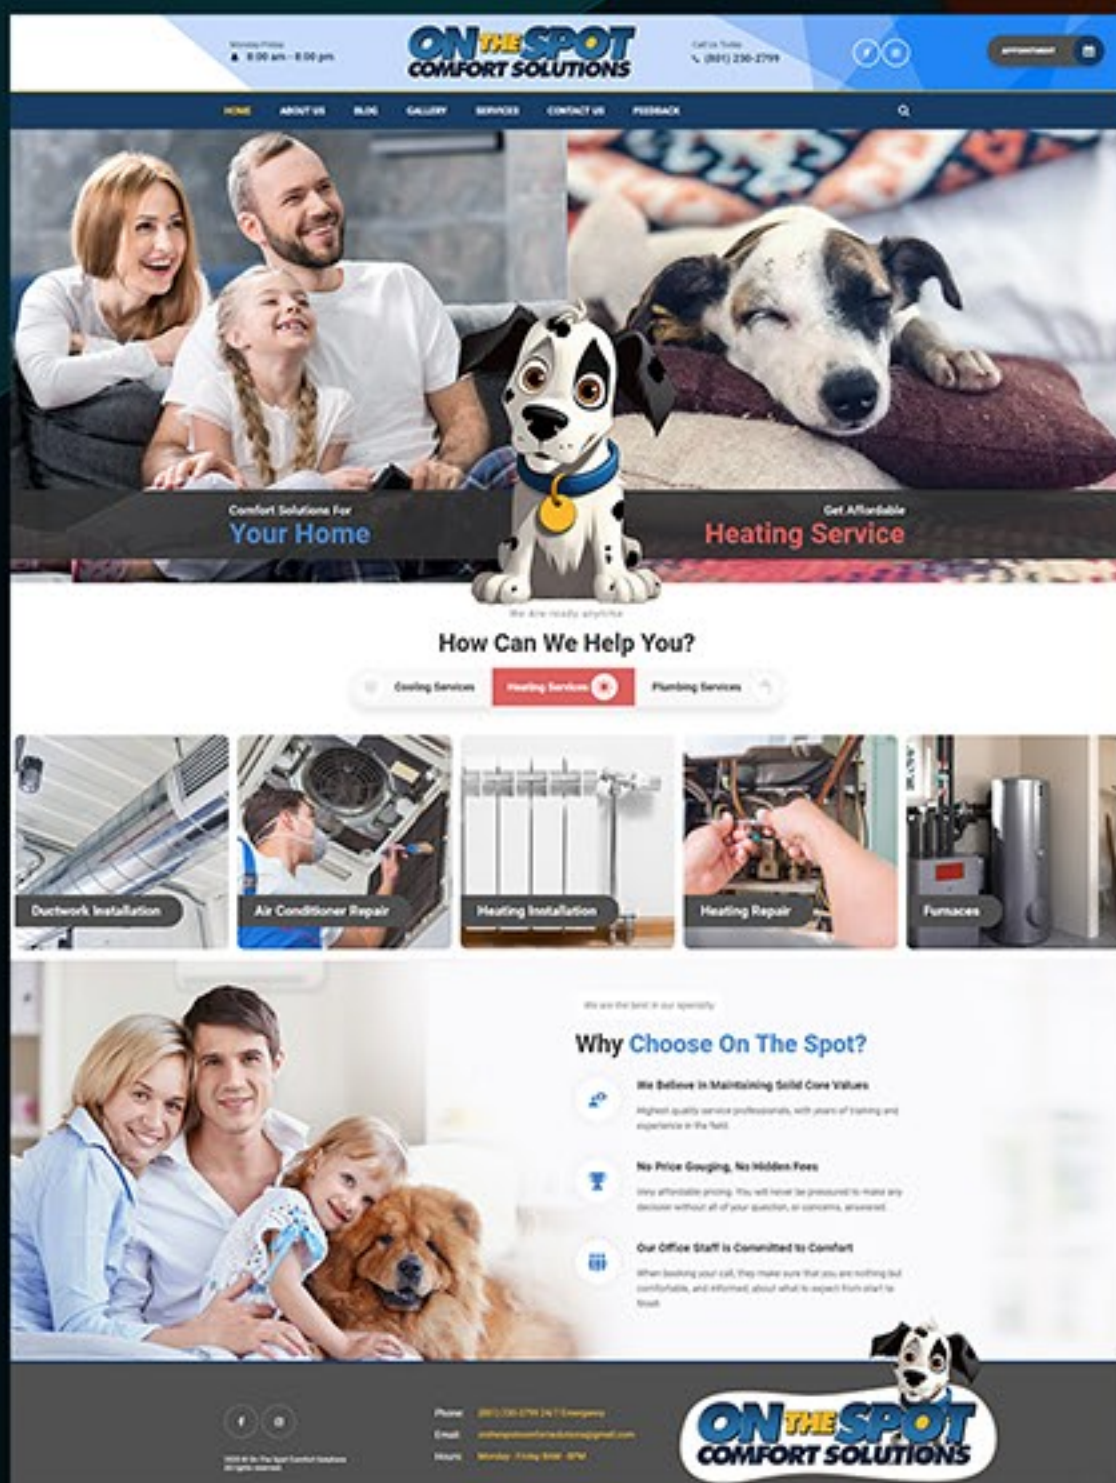

The first website I ever designed and published was for a hobby gaming site back in 1997. My first professional web design job was in 2006. Web design trends have evolved a lot since then. That being said, I always strive to design "future oriented" so that a 5 year old design still *feels* modern.

PRINT ON DEMAND

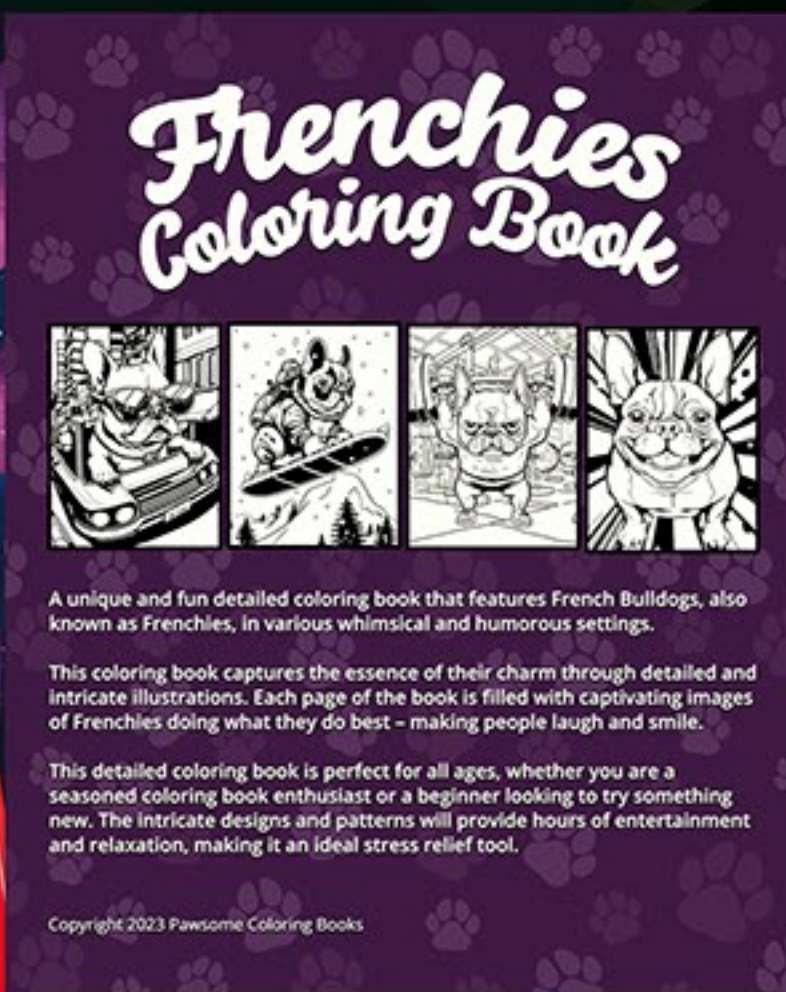

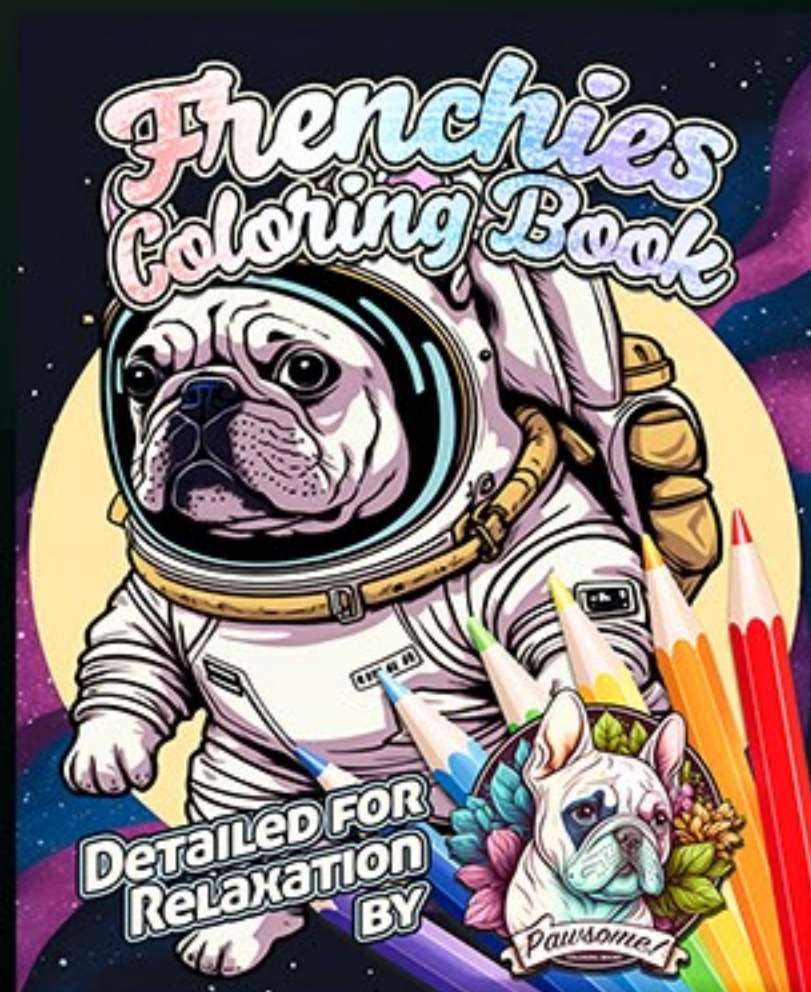

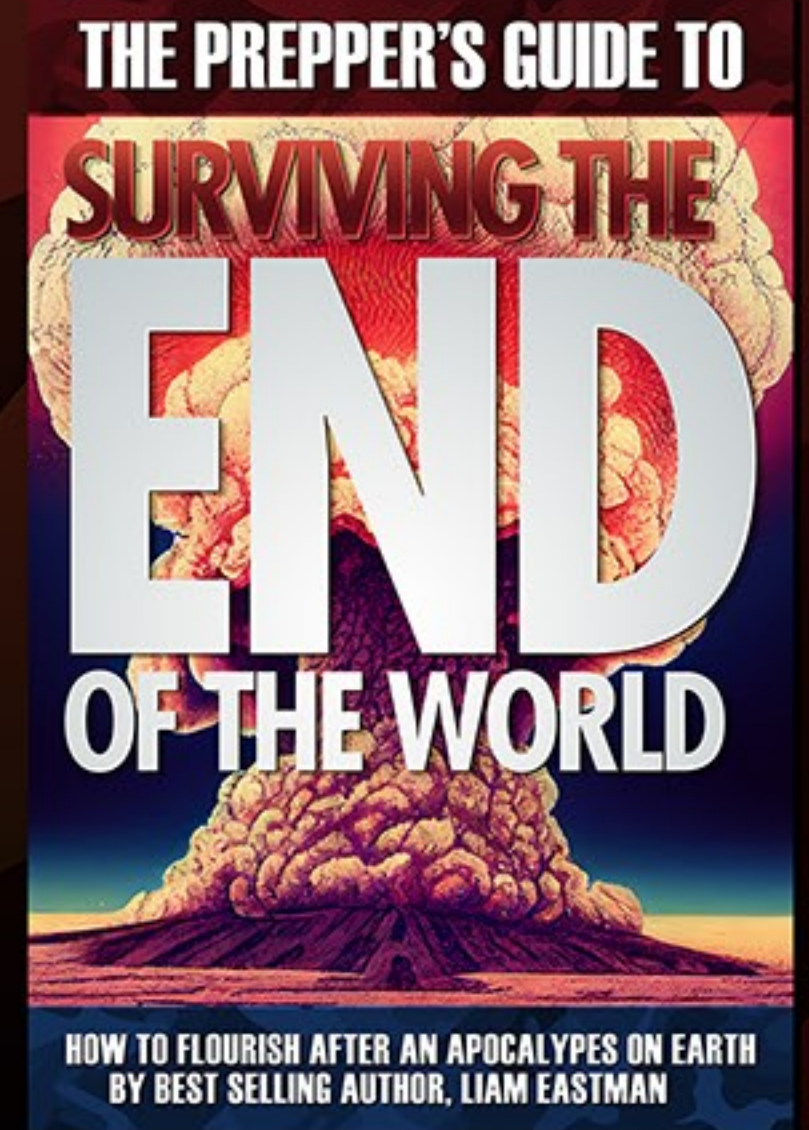

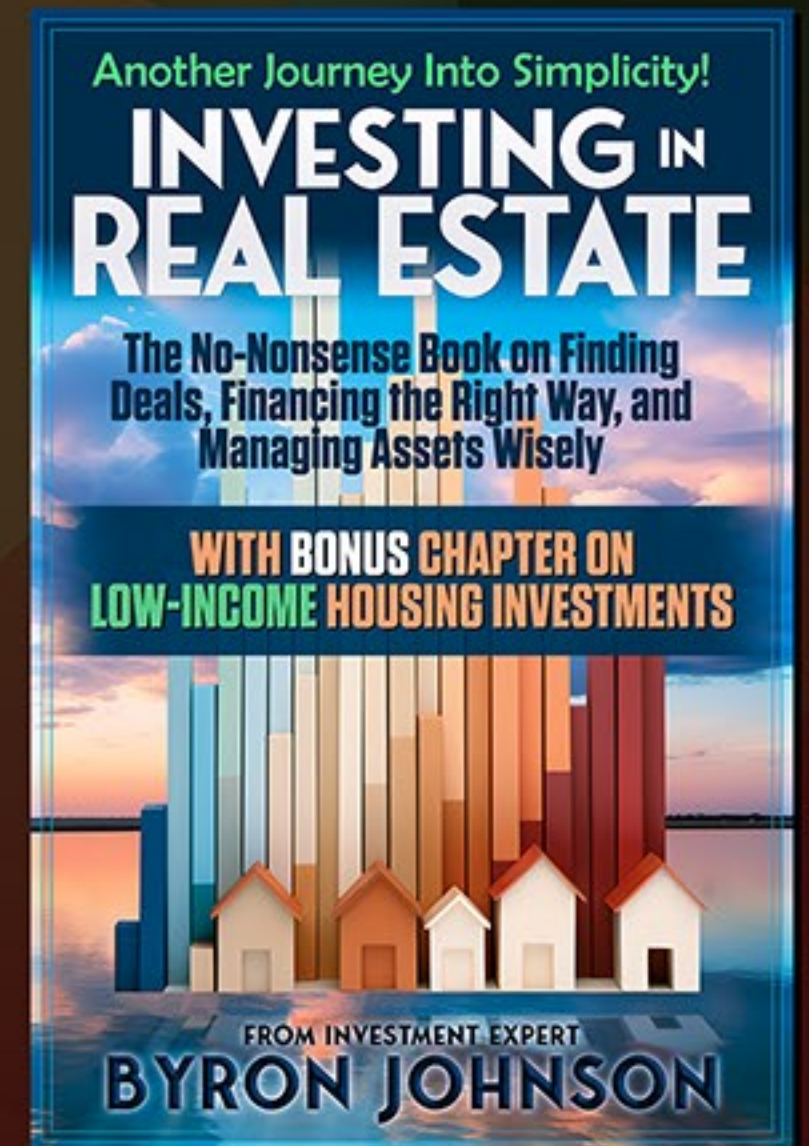

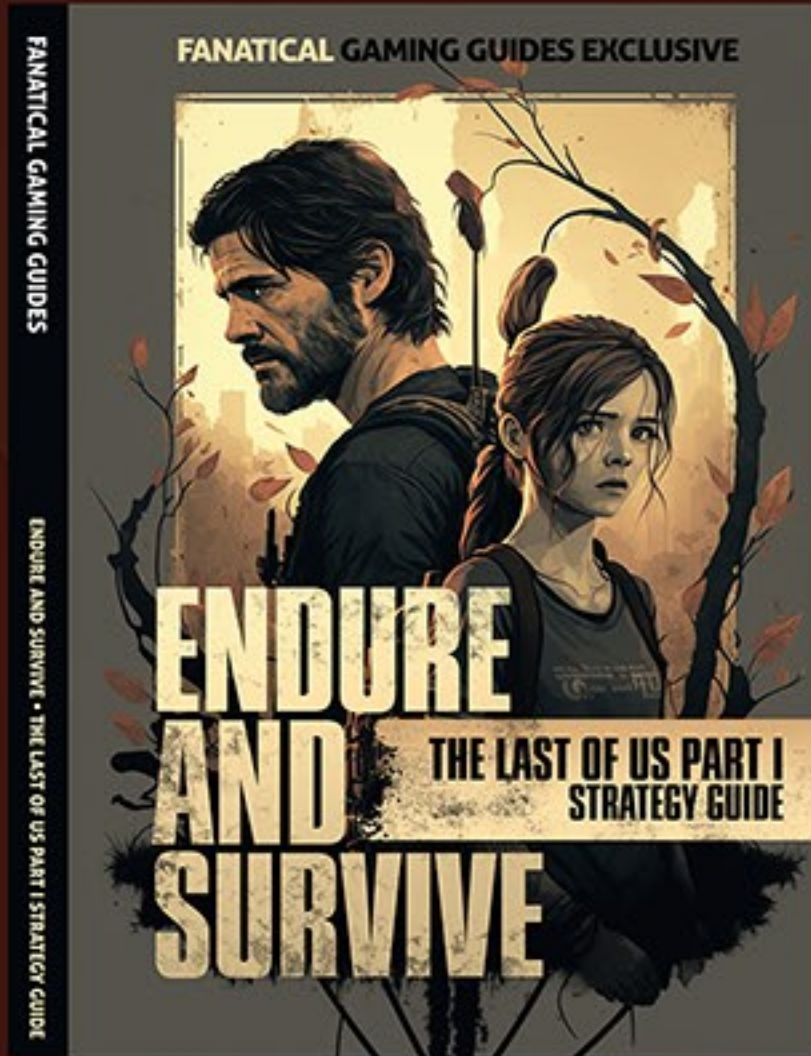

These are design examples for **The Vile Vegan** a print on demand brand I created, inspired by my vegan wife.

THE VILE VEGAN

BOOK COVERS

These projects were created utilizing assets from Generative AI tools. I can produce bashed cover designs like these at a breakneck pace.

COMIC BOOKS

Previews from Tales from Our A.I. Overlords, a Science Fiction anthology series illustrated with AI Assets.

CONSISTENCY IS KEY

The biggest challenge when creating an illustrated story using AI is keeping a consistent character design and artistic style. These examples are from the first two books in the series.

IMMINENT IMPACT IS PROBABLE.
